

## Programmable Time Switch for Industrial Applications

### Remote Control

Take control of your facility from anywhere using your smartphone to set lights, fans, pumps, etc.. Any electrical load can be turned on or off.

### Astronomic Clock

Setup any set schedule or use the astronomic clock to automatically adjust the schedule around sunset and sunrise.

### Easy-to-Program

Use the GridNavigator app to register your time switch in less 2 minutes and then start controlling your load. Does not require a factory technician for startup.

### Internet Outage

GridNavigator Smart Switch has an embedded schedule memory that ensures your device will deliver uninterrupted operation should an internet outage occur. It's the perfect failsafe system.

### Product Warranty

GridNavigator Smart Switch includes a built-in 2-year product warranty.

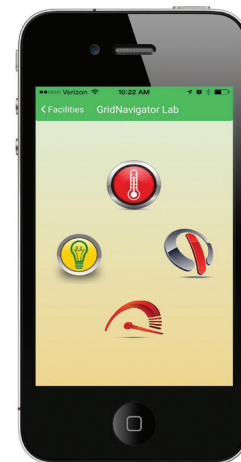

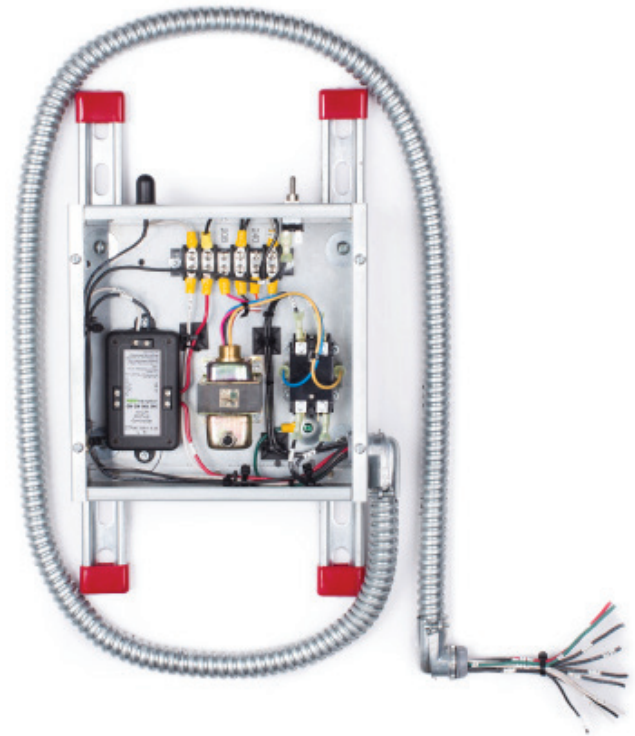

### Technical Support

No outsourcing of technical support allowed! Our trained in-house technicians are available to assist you between 8 am and 5pm eastern standard time

### Manual Override

Disconnect the Bridge Router from power and wait 5 minutes to close the contractor

**Works up to 3 one hundred  
amp contactors at once  
Add more switches for \$55 each**
